

Przerzut raka gruczołowego okrężnicy do zatoki klinowej

Metastasis to the sphenoid sinus from an adenocarcinoma of the colon

Elżbieta Nazim-Zygadło, Paweł Dobosz, Jan Kochanowicz, Krzysztof Czajewski

Summary

The authors present a very rare disease - metastasis of colon adenocarcinoma to the sphenoid sinus based on their own case. The sphenoid sinus was the first place of metastasis. Symptoms were characteristic of sphenoid sinus lesions. Histological examination of sphenoid sinus tissues revealed primary site of the tumour.
