

Rzadki przypadek nerwiaka osłonkowego ślinianki przyusznej

A rare case of schwannoma in the parotid gland

Jacek Kozakiewicz, Edyta Ślipczyńska Włoczyk, Joanna Wolańska-Karut

Summary

Schwannoma of the head and neck may origin from many nerves, i.e. cranial or spinal. The authors described that rare benign neoplasm of peripheral nerve sheath, localized in parotid gland in a 68-year-old female. For diagnosis FNB, USG were carried out. The patient was treated surgically.
