

Niedosłuch czuciowo-nerwowy jako następstwo zatrucia tlenkiem węgla

Sensorineural hearing loss as a consequence of carbon monoxide intoxication

Wojciech Skrzypczak, Katarzyna Gałecka, Andrzej Skorek

Summary

The authors describe the case of acute carbon monoxide intoxication in a 19 year old female patient, which caused, among other symptoms, bilateral sensorineural hearing loss. The symptoms, diagnostic methods and treatment with a particular regard to audiological examination were presented. Pathomechanism of carbon monoxide intoxication was also discussed. Despite the treatment, the effects of therapy have not been satisfactory.
